NATIONAL OBSERVATORY OF ATHENS
RECOGNIZED AS A LONG-TERM OBSERVING STATION
BY THE WORLD METEOROLOGICAL ORGANIZATION
IN MAY 2017 FOR MORE THAN 100 YEARS OF
METEOROLOGICAL OBSERVATIONS

A blue ink handwritten signature, which appears to be 'P. Taalas', is written over a horizontal line.

Prof. Petteri Taalas
Secretary-General of WMO

Long-term meteorological observations are part of the irreplaceable cultural and scientific heritage of mankind that serve the needs of current and future generations for long-term high quality climate records. Their continued future maintenance will ensure that these unique sources of consistent past and contemporary information about atmospheric parameters serve as references for climate variability and change assessments and as prerequisites for efficient climate services. By recognizing long-term observing stations according to a list of criteria, WMO promotes sustainable observational standards and best practices that facilitate the generation of high-quality long-term time series data.

This certificate refers to Decision 8 (EC-69), May 2017; the recognition will be reviewed every 10 years.
